

Communications Platforms/HiPath 500 Range

HiPath 500 V7.0

As a pure ISDN system, HiPath 500 delivers the complete benefits of HiPath 3000, with the exception of VoIP functionality. The HiPath 500 is designed as a professional communication system for small companies with up to 12 users and boasts an extensive range of integrated solutions such as voicemail. Premium voice features and reliable, traditional telephony coupled with quick installation and simple maintenance make HiPath 500 an attractive solution.

HiPath 500 is now available in 2 model variants with fixed expansion options;

HiPath 540

- 2 x ISDN
- Up to 4 digital system phones
- Up to 4 analogue standard phones (with CLIP and CNIP)
- HiPath Cordless with up to 3 base stations and 16 handsets
- Integrated Voicemail

HiPath 580

- 2 x ISDN
- Up to 8 digital system phones
- Up to 4 analogue standard phones (with CLIP and CNIP)
- HiPath Cordless with up to 3 base stations and 16 handsets
- Integrated Voicemail
